DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Safrit et al (3625029).

The disclosure of Safrit et al (3625029) teaches the boxer short type article as claimed including a trunk part (11) being made of a loose fitting textile and leg parts (14) made of a form-fitting textile. Note that the article is circularly knit. Note the spandex or elastic yarn (17). Note the welt (13) and waistband (10). As shown in figure 6, note the horizontal line in the crotch portion. Safrit et al (3625029) also sets forth the method as claimed including the steps of circular knitting a bottom welt (13) a waistband (10), knitting a leg part with a yarn (17) having a higher elasticity than the elasticity of the yarn used for knitting the trunk (11) portion. Note the plating shown in figure 2.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
